WORK EXPERIENCE

Lawrence Berkeley National Laboratory **Berkeley, CA**
Research Affiliate *Jun 2025 - Aug 2025*

- Assisted in the design and assembly of a benchtop alternating gradient force magnetometer using cost-efficient components while maintaining high sensitivity levels.
- Collaborated with a senior researcher on designing and creating a script to run the magnetometer.
- Implemented innovative troubleshooting techniques during construction and script building, increasing efficiency and reducing run time by 30%.

California State University, East Bay **Hayward, CA**
Learning Assistant *Aug 2024 - Present*

- Coordinated communication between 70+ students and the course professor, facilitating prompt responses to inquiries and enhancing overall student satisfaction by 40%.
- Streamlined class preparation processes by organizing resources and materials for 10 weekly sessions, contributing to a 30% reduction in instructional time lost to logistical issues.
- Supported the development of supplemental educational resources that improved student performance metrics, resulting in a 20% increase in average grades across the course.

LEADERSHIP EXPERIENCE

Datathon 1.0 **Hayward, CA**
Participant *Nov 2024*

- Created an AI tool to help new up and coming businesses by giving advice based on the top 500 companies in the US
- Developed a database of the stock prices from the past 20 years of the top 500 companies and finding certain spikes or dips in the stock prices to find impactful business decisions that a certain company has made.
- Utilized Finnhub API to accumulate data for the top 500 companies and SQL to create a database which would be used as reference for the advice being generated by hugging face API.

Hack Hayward 2025 **Hayward, CA**
Participant *Mar 2025*

- Won first place in the Sustainability with AI track.
- Created an AI check-in website to help hospitals streamline the check in process for patients by prompting patients to either text or talk about the symptoms they are experiencing to direct them to the correct doctor.
- Utilized AssemblyAI API to create a speech to text program and PerplexityAI API to summarize the symptoms and find possible causes of the illness.

Mesa U Hacks 2.0 **Hayward, CA**
Participant *Sep 2025*

- Won second best pitch
- Developed an AI study tool which summarizes notes, generates flashcards and practice questions, supports multi-user cloud access, and features a gamified leaderboard for progress tracking.
- Utilized Google Vision API OCR (Optical Characteristic Recognition) to find and extract text from Images and OpenAI gpt 4.1 mini to generate summarizations, flashcards, and questions while being effective and lightweight.

NVIDIA World's Shortest Hackathon **San Francisco, CA**
Participant *Oct 2025*

- Engineered ParkSF, a full-stack web application that locates the nearest available parking spots in San Francisco within a 2-hour hackathon timeframe.
- Integrated the Google Maps JavaScript and Places APIs to retrieve live parking and routing data, dynamically updating map markers and directions.
- Utilized Vercel v0 for rapid front-end development and serverless deployment, implementing a React + Next.js architecture for scalable performance.

EDUCATION

California State University, East Bay **Hayward, CA**
BS in Computer Engineering (GPA: 3.5) *Expected Graduation Date: May 2027*

SKILLS & INTERESTS

Skills: Microsoft Office | Python | Canva | Javascript | MIPS Assembly | C++ | CSS | HTML
Interests: Programming | 3D Design | Robotics | Badminton | Food Science
